

TE Connectivity – the World Innovation Technology Leader enables advancements in transportation, industrial applications, medical technology, energy and data communications. TE's unmatched breadth of connectivity and sensor solutions, proven in the harshest of environments, helps build a safer, greener, smarter, and more connected world.

At TE Connectivity, we deliver solutions to energy and utility customers across the world, which allows them to build reliable infrastructures in the most challenging environments. From developing new networks in emerging countries to strengthening grids in mature ones, we focus on creating specialized solutions that meet our customers' needs. We are where our customers are, working with them early in the planning stages of a new project, and offering installation and local support to ensure the best performance every step of the way.

TE Connectivity, Energy Business Unit is currently seeking a **Junior Pricing Analyst** to join the EMEA pricing team.

JUNIOR PRICING ANALYST

Location: Szczecin

As part of our EMEA Commercial team you will be responsible for providing support in following tasks:

- Determining the price of new and existing products & services by evaluating cost, market-place, competitor data, economic conditions, volume, and quality of the product, as well as market positioning.
- Performing various pricing activities for specific accounts / territories / products by following the pricing process and policy to ensure quotes and corresponding pricing decision to be made accurately upon customer speed
- Ensure all prices are correctly and timely loaded in the ERP system
- Monitor the performance of the pricing actions taken and of our pricing agreements
- Identifying opportunities related to low margins, price erosion, commercial terms & conditions, and propose solutions that will improve our overall margin

Our requirements:

- Minimum Bachelor's degree in an analytical field, f.ex.: Business, Economics, Mathematics, Finance
- Action & Result Oriented attitude
- Data-driven, analytical & process mindset
- Customer Focus
- Excellent written and verbal communication skills, fluency in English

We offer:

- Opportunity to work with latest technologies, participation in international projects, cooperation with a highly qualified global team
- Stable and permanent employment based on a job contract
- Attractive salary base on experience and skills presented
- Medical service package and insurance
- Tools for full use: laptop + mobile phone
- Possibility of continuous development and improvement of qualifications
- A challenging job in a dynamically developing international corporation
- Team support and a pleasant working atmosphere

Please send your CV in English language to Joanna.szewczyk@te.com
